CAPSTONE 48

AI INFOGRAPHIC SET ON A SOCIAL TOPIC

E-Waste in India

Audience: Indian college students

Prepared by	S Nithiya Dharshini
Programme	AI & Data Science
Institution	Dhanalakshmi College of Engineering

1. Project Summary

This project uses AI-assisted research, writing, visual design, accessibility drafting, and presentation planning to create a coordinated three-part infographic set about e-waste in India for college students.

2. Key Verified Facts

Claim	Verified wording / qualification
India FY 2023–24	1,254,286.55 metric tonnes generated (CPCB estimate reported by PIB).
India FY 2024–25	1,397,955.59 metric tonnes generated (CPCB estimate reported by PIB).
India combined metric	70.71% for FY 2024–25 under the source wording: collected, dismantled and recycled/disposed. This is not a pure recycling rate.
Global 2022	62 million tonnes generated; 22.3% documented as formally collected and recycled. This global metric differs from India's combined metric.

3. Infographic Set

01 — The E-Waste Challenge	Indian e-waste generation figures and a selected-year comparison chart.
02 — Why E-Waste Matters	Environmental and health risks, with safer management practices.
03 — What Students Can Do	Repair/reuse, separation, data protection, authorised collection, and thoughtful purchasing.

4. AI Skills and Workflow

Skills represented include source discovery, prompt engineering, fact-checking against original sources, summarisation, visual communication, accessibility/alt-text drafting, iterative editing, and presentation planning. List only tools actually used in the final submission; free-tier availability can change.

5. Verification and Limitations

Five headline claims are recorded in the verification register. The Indian 70.71% combined metric and global 22.3% indicator have different definitions and must not be compared as equivalent measures. Illustrative AI visuals are not documentary photographs.

6. Final Submission Checklist

Status	Item
✓	Project report updated with the GitHub repository URL.
✓	GitHub repository created (URL supplied by the student).

Status	Item
✓	Three infographic PNG files included in the project package.
✓	Captions and alt-text document included.
✓	Research fact sheet and source list included.
✓	Verification register and report included.
✓	Presentation deck and design/prompt documentation included.
✓	Updated project package assembled as a ZIP file.
✓	Project report exported as a clean PDF.
✓	Final submission checklist file included.

7. GitHub Repository
